1.0 LOGO

The Summer Nations Series logo is one of the most distinctive elements of the brand. In order to maintain the brand integrity it is important to use the logo as specified in these guidelines.

Logo suite

There are three logo variants to ensure legibility is maintained at all sizes.

Master logo
Our primary brand device is how the world will identify us. The master logo should be used wherever possible.

Optimised logo
To be used when the legibility of the master logo suffers due to X height restrictions or when a mono logo is required.

Symbol
The symbol must only be used in the smallest of spaces where the master or optimised logo is not suitable, for example in a social network profile picture.

1.0 Master logo

2.0 Optimised logo

3.0 Symbol

1.0 Master logo

The master logo is always set in the full colour gradient. Do not set the master logo in any other colour.

There are two variants, one for dark backgrounds and one for light backgrounds.

For instances where a mono logo is required, the optimised logo should be used. Please see Page 9 for further detail.

Logo variations

Master logo - dark background version

Master logo - light background version

1.0 Master logo usage

Exclusion zone
The exclusion zone ensures the legibility and impact of the logo by isolating it from competing visual elements such as text and supporting graphics or other brand logos.

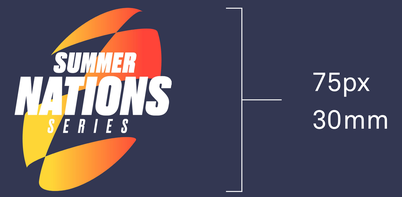
This space has been defined as the height of 'Nations' type. This zone should be considered as the absolute minimum safe distance, it can be increased if desired.

Minimum size
Establishing a minimum size ensures that the impact and legibility of the logo is not compromised in application. The minimum sizes are calculated based on the variation of print and screen based media resolution.

If an application requires a logo smaller than 75px or 30mm in height then the optimised logo or symbol should be used.

Minimum clearance

Minimum size



2.0 Optimised logo

The optimised logo exists in full colour for dark and light backgrounds as well as a positive and negative mono.

Do not set the optimised logo in any other colour.

Logo variations

Optimised logo - dark background version

Optimised logo - light background version

2.0 Optimised logo

Do not set the optimised logo in any other colour.

Logo variations

Optimised logo - mono white

Optimised logo - mono black

3.0 Symbol usage

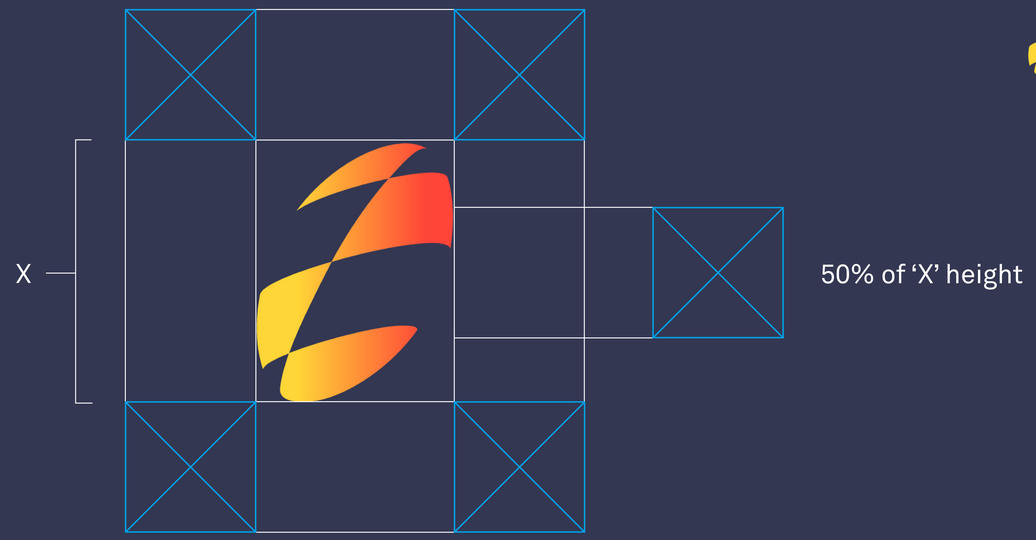
Exclusion zone
The exclusion zone ensures the legibility and impact of the symbol by isolating it from competing visual elements such as text and supporting graphics or other brand logos.

This space has been defined as 50% the height of the symbol. This zone should be considered as the absolute minimum safe distance, it can be increased if desired.

Minimum size
Establishing a minimum size ensures that the impact and legibility of the logo is not compromised in application. The minimum sizes are calculated based on the variation of print and screen based media resolution.

Do not use this symbol smaller than 25px or 8mm.

Minimum clearance



Minimum size

2.0 COLOUR

The Summer Nations Series colour palette is designed to give a next generation feel, to create stand out and to sit above the colours associated with the Unions whilst also projecting summer vibes.

Colour: RGB values

Our vibrant colour palette gives a strong foundation to create bold communications.

The dark gradient should always run at a -150° angle from grey at the top to black at the bottom.

The bright gradient should always run at a 0° angle from yellow on the left to orange on the right.

Please see Page 18 for colour combinations to be used in typography.

3.0 TYPOGRAPHY

Typography plays an important role in expressing our energetic and bold character. Our headline font is dynamic and brings sporting attitude, whilst the body copy font brings clarity to our communications.

Typography: typefaces

Druk Super Italic is our primary headline font, it should always lead communications.

Druk Heavy Italic, Medium Italic and Medium are our secondary headline fonts. They can be used to complement Druk Super Italic but should only feature if the primary font is present. See the example creative executions for context of their usage.

Druk should not be used as a body copy font. Akkurat Regular is our body copy font. Akkurat Bold can be used for body copy headlines or to highlight parts of the communication.

Akkurat should not be used as a headline font and it should only feature if the primary font is present.

Druk can be purchased here

Typography: colour combinations

To maintain a cohesive approach to brand communications and retain a strong legibility, some colour combinations should be used and others should be avoided.

Colour should be used to create harmony and bring pace to communications.

Avoid using colour combinations that offer poor contrast. Avoid using colours that clash.

Do’s and Don’ts

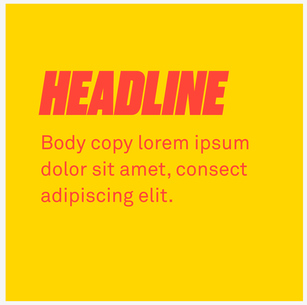
White type on dark grad

White type on bright grad

White type on ANS grey

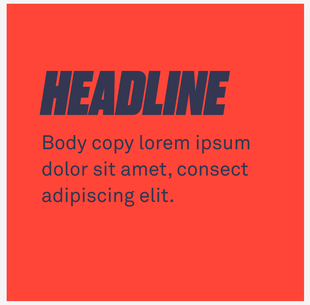
Black type on white

White type on orange

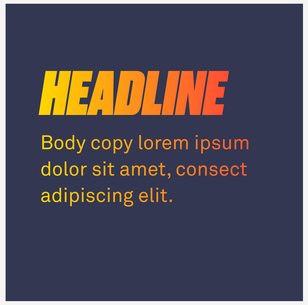


Orange on yellow

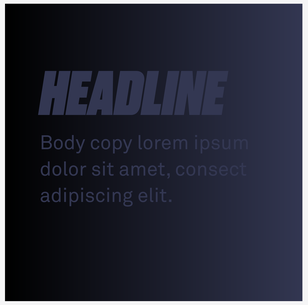
Yellow on orange



ANS Grey on orange



Bright grad on type



Poor contrast

4.0 GRAPHIC PATTERN

Our graphic pattern originates from the master logo. It should be used sparingly as a framing device to bring energy to communications.

Graphic pattern

As the graphic pattern originates from the master logo it is important that it is not altered.

There are 4 options:

- Dark grad background with small pattern
- Dark grad background with large pattern
- Bright grad background with small pattern
- Bright grad background with large pattern

How to use the graphic pattern

Do use the pattern to frame content

Do use the pattern sparingly

Do use a contrasting background and foreground gradient

Do use either the bright or dark variant

Graphic pattern

As the graphic pattern originates from the master logo it is important that it is not altered.

Do not modify the graphic pattern in any of the ways shown here.

How not to use the graphic pattern

Do not create a repeat pattern

Do not alter the gradient or use flat colour

Do not change the angle of the pattern

Do not allow the pattern to dominate the communication
